

Jobs

Your Job defines the shape of your Awakening - how you fight, what you channel, and what the Bureau classifies you as.

Jobs

When the Rift first touches you, something inside rewrites itself. The Bureau calls these patterns Jobs - broad classifications for how Ascendant power expresses.

Assassin

RANK: B

TYPE: JOB

The Assassin is an Awakened identity that specializes in the Dimensional Phase Operative and Umbral Walker mandate. As an Ascendant of this lineage, their consciousness partially exists between realities, granting them the ability to phase through the physical world and strike from impossible angles. In the modern era, the Assassin is the supreme specialist in surgical rift-clearing and high-value target extraction within high-rank gates.

Contractor

RANK: B TYPE: JOB

The Contractor is an Awakened identity that specializes in the Rift-Pact Vessel mandate. As an Ascendant of this lineage, their Awakening was not a gift from the Absolute - it was a bargain with an extraplanar entity whose sigil is literally branded onto their vessel. They draw power through an aetheric umbilical to their patron, trading autonomy for aetheric bandwidth that vastly exceeds their rank. In the modern world, Contractors are both the Bureau's most flexible pact-specialists and its most-watched liability; every pact is registered with Extraplanar Affairs, and every Contractor is subject to monthly resonance audits.

As the SA version of a Esper, their connection to the Aetheric-Weave is raw and volatile - mana bleeds from their body like radiation, reshaping reality through sheer willpower. In modern society, Espers are celebrities and pariahs in equal measure; their aetheric flares reshape the tapestry of existence with absolute authority.

Herald

The Herald is an Awakened identity that specializes in the Absolute Transmission mandate. As an Ascendant of this lineage, their nervous system was restructured at Awakening into a living antenna - a receiver tuned to the Absolute's broadcast, translating sanctified resonance into restorative, radiant, and reality-correcting mantras. In the modern world, Heralds are the Ascendant Bureau's field chaplains and raid medics; their very presence re-anchors an ally's vitals, and their mantras can mend shattered bones or incinerate unholy anomalies with equal authority. They are the bridge between civilians and the Absolute's will.

They work as guild leaders, Ascendant Bureau enforcement officers, and public defenders against gate threats. The oath grants devastating combat power, but break its tenets and the power is revoked painfully. They channel radiant Absolute energy through weapons, heal allies, and project protective auras.

Revenant

RANK: A TYPE: JOB

The Revenant is an Awakened identity bound to the End-Cycle mandate of Marthos, the Dragon-King of Void and Harbinger of Annihilation. As an Ascendant of this lineage, their body no longer runs on life - it runs on death. Sustained by the Void-Breath and by Remnants (fragments of severed life-essence reclaimed at the instant a creature dies), the Revenant is an unarmored drain tank that holds the line by feeding on the dying around it. They wear no armor and need none; entropy itself sheathes them, and the wounds that would fell others only deepen the harvest. The Ascendant Bureau deploys Revenants as immovable anchors at the worst gate breaks - the figure who walks into annihilation and walks back out, fuller than before.

In the modern world, Stalkers are the Bureau's preferred bounty and extraction specialists; they work alone, they always catch their mark, and when their name appears on a contract the global bounty network goes quiet.

They do not merely fight; they command the very flora and fauna of the dungeon dimensions. In modern society, Summoners are the premier ecologists of the Ascendant Bureau, serving as the bridge between human civilization and the rapidly evolving lifeforms of the Gate-Era. They shapeshift into gate creatures, command gate environments, and are the only ascendants who can predict boss spawns by reading resonance markers.
